

# HYDRAULIC MAUSOLEUM LIFT

## Scissors Lift

Hydraulic scissor lift provides a simple and efficient means to transport caskets, raise them to crypt height and complete the entombment. In addition, the flexible design of these lifts make them useful in display applications and as platforms for aerial maintenance.

## FEATURES

- 1,000 pound lift capacity.
- Four stabilizers for greater safety and security.
- Quiet dependable motors.
- Ideal for lifting and display.
- Two man cages with 42" high steel railings.
- Convenient height for loading.
- Caster steering.
- Fits easily through 36" doorways and narrow aisles.
- Casket locks for firm control.
- Compact design; requires little storage space.
- Virtually maintenance free
- Auxiliary/manual "down" valve.
- 42" steel rails with 4" toe boards.
- Battery operated with built in battery charger.
- Meets all applicable OSHA standards.
- Two year warranty.
- Options

- |   |                             |

## ROLLING LADDERS

### Slip-Resistant Perforated Tread.

Provides maximum slip-resistance and comfort when sitting or kneeling on steps.

### First-Step Actuated Locking System.

Locks the ladder in place when an individual steps on the first step (standard on 6-step ladders and taller; springloaded casters used on smaller models). Step-lock is standard on ALL Safety-Angle models.

### Heavy 1-1/16" Diameter Tubular Construction.

Provides superior strength and long-lasting durability in the toughest environments.

### Durable Powder-Coated Paint Finish.

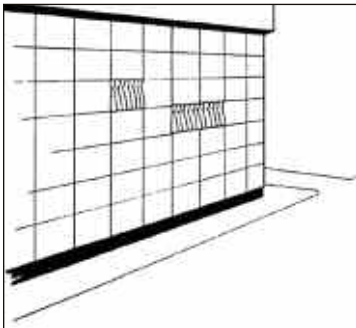

Baked-on gray finish provides a premium quality, scratch-resistant finish that is durable and long-lasting.
